Summary

Software Developer with **2+ years of experience** in building and improving reliable software systems. Proficient in **Java** and **Python**, with a strong focus on **REST API development** with **.NET Core**, performance optimization, and **database management** using **SQL** and **MongoDB**. Experienced in **CI/CD environments** and version control systems like **Git**.

Experience

Freelance programmer 2022-2024

- Built a mobile Warehouse stock tracking app in **Flutter** integrated with **Firebase** authentication and real-time data sync
- Developed an Ecommerce landing page in **React** that increased client lead conversions by ~25%
- Designed and built a "JobCompass" tool, a FullStack job application tracker with **React**, **Node.js**, and **MongoDB**, featuring authentication, live statistics and an **AI** powered resume feedback tool
- Customized **WordPress** websites for small businesses, implementing tailored **JavaScript** and **PHP** features like application forms and content access groups

[OSA Commerce](#) 2022-2024

Software Automation Engineer

- Created **Selenium** based automation tests that reduced manual QA time by 40% for web and desktop platforms.
- Integrated multiple Ecommerce **API**s in **JavaScript**, enabling automated product **CRUD** actions and customized sync across marketplaces.
- Improved **SQL** query efficiency by 30% through indexing and query refactoring, reducing page load times for internal dashboards
- Wrote clear technical documentation for APIs, bugs, and workflows

Education

B.Sc - Bachelor of Science in Computer Science 2019-2022

- Built a solid foundation in **Algorithms**, **Object Oriented Programming (OOP)**, and **Data Structures**. Completed projects involving **C#** and **Python**, emphasizing system design and performance optimization
